# Spray Smart

BEST PRACTICES FOR  
PYRETHROID  
APPLICATIONS

**1**

2' up  
3' out

**Structure Base**  
STAY 2 feet up and 3 feet out as directions permit

**2**

1'  
2'

**Spot Spray**  
NO LARGER than 2 square feet

**3**

**Drains**  
Do NOT allow the pyrethroids to enter drains

**4**

Crack  
Crevice

**Cracks & Crevices**  
Spray MUST stay in cracks & crevices

**5**

1" [

**Pin Stream**  
On vertical & horizontal surfaces that do not have cracks, a pin stream application of 1" OR LESS is permitted

**6**

DRIVEWAY OR HARD SURFACE

Pin Stream OK  
↓ 2' away

**Horizontal Surfaces**  
Broadcast spray must stay at least 2 feet AWAY from concrete AND hard surfaces

Avoid spraying on hard surfaces like driveways & sidewalks that lead to gutters & drains to minimize pyrethroid runoff.

Always read & follow label directions.
